HERD LAW

M. D. of Collholme

PLEASE TAKE NOTICE, that the animals mentioned in subsection 1 of section 2 of the Herd By-Law of this municipal district shall, this year, be allowed to run at large until the 15th day of May.

By Order of the Council.
LORNE PROUDFOOT,
Secretary.

BREEZELETS

A newspaper heading says the railway bill was hauled over the coals in the house.

But what concerned most of us was bill for coal hauled to our houses during the past very long winter.

As usual most important legislation is being rushed in the dying hours of the session at Edmonton.

Yes, but voting themselves \$2000.00 went through with a hummer.

Hon. Arch. McLean is in Ontario looking for hay.

It's a joke! Look out, Archie, or you may get "hay-fever."

A New Jersey judge has officially declared that it is no crime to kiss a girl.

Wonder if the judge has any pretty daughters.

Rev. Father Vaughan designate as "emotional" the modern gowns of women.

Yes, if our grandmothers were able to see some of the women's "emotional" gowns of to-day, they would certainly declare it was a "crying" shame.

What the farmers of Alberta need just now is a liberal dose of Pat Burns' optimism.—Calgary Herald.

Let the optimistic Pat Burns exchange places with some of our farmers with a three year-no-crop record and then watch Pat's optimism. A man possessing a few million dollars can afford to be optimistic.

What many of the farmers need the most just now is the loan of some of Pat Burns' optimistic dollars.

A man who speaks six languages, other than English, is being held by the authorities at Ellis Island as an illiterate.

Possibly could the authorities interpret some of the illiterate's words, they would have been shocked, by heck!

A bottle with a message in it has been picked up upon the shores of the Pacific at Vancouver.

That's nothing. Several bottles have been stranded along the beach of Sounding Creek with their messages delivered.

Sale of Niobe is contemplated at Ottawa.

At one foul swoop Canada's navy will be a thing of the past.

GOLDEN CENTER COUNCIL

The 2nd meeting of council of M.D. of Golden Centre, was held on Wednesday, April 7

Members all present

Minutes read and adopted.

Correspondence read and disposed of.

As a trial, one doz packages of Fly Exterminator was ordered.

It was decided to lease s.e. 17-31-6 and s.w. 16-36-6 for 10c per acre and payment of supp. rev. and educational taxes, with privilege of renewing lease and to remove fence in event of land being sold.

Reeve and Secretary were empowered to make duplicate note for one lost.

It was decided to hold Seed Grain Com. responsible for seed oats shipped in 1918 to F. M. Hopkins, in error.

Offer of E. E. Davies to remove fence n of 29-29-6 for \$35 was rejected.

Secretary read financial statement to date.

Guarantee was given to Cereal Co-operative Credit Society to extent of 50 % of subscribed stock.

Councillors Fulton and McConnell were appointed to attend sale of A. T. Affleck and represent us, re seed grain liens.

Harry Eckert was appointed assessor at 30c per quarter sect'n work to be completed by Aug. 1

One weed inspector will be appointed in each range. Tenders for same by the day to be made at next meeting.

N. D. Ross was appointed auditor at a salary of \$100 per year.

By-law No. 26, relating to seed grain and feed loans for \$4900 was read three times and adopted.

It was decided to make no advances on unpatented land without security.

By-law No. 57, to provide relief on unpatented land, was read three times and adopted.

It was decided to offer bounty for destruction of gophers as follows: From April 7th to May 5th, two cents each; May 5th to June 2nd, one cent each, tails to be delivered in parcels of 25 each to a councillor or sec.-treas.

W. E. Briggs, J. P. Opheim and W. H. McIntyre were recommended as hill inspectors.

W. H. Short was given ten days to remove fence w 7-29-6, and upon failure to do so to refer matter to J. J. Kelly, solicitor.

It was decided to reject all further applications for seed and feed.

Fees for councillors were fixed at meeting: Reeve, \$5 per day and 10 cents per mile each way; members \$4 per day and 10 cents per mile each way.

Fees for road inspection were

CHINOOK BREEZES

Our little friend, the "sketter" is due to arrive soon now.

Winter, this year, is "sticking closer than a brother."

It looks as though summer will be in the lap of winter.

Mr. and Mrs. W. L. Carter of Delia are visitors at the Acadia hotel.

The snow that has fallen in this vicinity during the week will certainly help some.

On Wednesday afternoon, the ladies' aid were very pleasantly entertained by Mrs. J. L. Carter at the Acadia hotel.

Next Sunday evening, in the absence of the pastor, Mr. E. T. Mitchell will take charge of the service in the Chinook church.

Mrs. Main and her sister from Alaska, are visiting the former's daughter, Mrs. Chas Wylie, this week.

Special meeting of the ladies aid is called for Wednesday afternoon, the 28th inst. at the home of E. T. Mitchell, to open the missionary boxes.

Mr. E. Teggart of Rearville, who has spent the past four or five months at his old home in Ireland, returned to Chinook last week.

The ladies aid will hold a sale of Plants at the Chinook restaurant, on Saturday, the 24th inst. This will be a good opportunity to get plants for the spring and summer.

The prize list for the Chinook agricultural society's fair is in the hands of the printer, which it is hoped will be completed early next month. This year the list has been greatly enlarged and will be found very attractive to exhibitors in all classes. The list of special prizes has been more than doubled.

REARVILLE

A concert and hance was held in Acadia hall, on Friday, the 9th inst, under the auspices of Langford U.F.A., when a very socialable and enjoyable night was spent. The program consisted of songs, solos, recitations and duets, which were very pleasing and appropriate and greatly enjoyed by all. Dancing commenced at about 12 p.m., everybody was on the hop until 12 p.m., when supper was served by the lady members, who seem to have the knack and are known to always have a good supply of dainty cakes, &c. Some remarks being passed that Langford U.F.A. dances are getting better all the time. Dancing was again resumed until daylight. Some twenty dollars were cleared over and above expenses, which was very good considering the inclemency of the weather.

Mr. Warren, supt. of yards for the Crown Lumber Co., was in town to-day.

Canada's and the World's Need

Occasions arise when it becomes the patriotic duty of every man, and woman too, to forget, neglect, even sacrifice, their own work and interests for the general good of their country. Such an occasion arose with the outbreak of the Great War. The happiness and comfort of home, success in business achievement, the general betterment of one's position in life and the promotion of the family's welfare, usually and properly the chief worldly concern of any person, suddenly became matters of minor importance. The liberty of the whole human race, the basic principles on which civilization rests, the ideals and independence of the nation itself, were jeopardized and their destruction threatened. In these circumstances, one's devotion to purely personal interests became utterly selfish and unworthy.

Generally speaking, a man serves his country and the cause of humanity ably and well when he devotes his best thought and energies to the every day work which calls for attention, providing the work in which he is engaged is legitimate and worthy. It should not be, of course, a selfish absorption in his own interests to the exclusion of everything else. It should not be a miserly regard for personal gain irrespective of the effect on others, and wholly neglectful of the finer things in life and of community and national interests. But, on the whole, the person who does his work faithfully and well is serving his country and fellowmen at the same time.

This, let it be repeated, is true as a general proposition, but it is never more universally true than it is at the present time. The needs not only of Canada, but of the whole world, the needs of that civilization which was saved from destruction in the battlefields of the world during the historic years 1914-1918, call imperatively to every Canadian to "be on the job" doing his own particular work at this time.

There is no need for emphasizing this fact because there is in evidence on all sides of an inclination to "let up," to put less effort into one's work, in a word, to get through the day as quickly and easily as possible, and this at a time when, because of the wholesale destruction of goods and wealth caused by the war, there is greater need than ever before for a maximum of productive effort. As has been pointed out over and over again, not only do men insist upon easier work, shorter hours of labor, more pay and more of the good things of life, but they become indignant if the price of these goods goes up. Yet it must be apparent to all intelligent and reasonable men that if less is produced and more is consumed scarcity must result and a rise in prices becomes as inevitable as the force of gravity.

This general relaxation is, however, a natural sequence of the war, and it is not confined to any one class of the population of this and other countries. It is manifest in all ranks of society. During the war there was a tremendous urging of farmers to work early and late and increase food production, and of all industrial workers to turn out a maximum of goods. This same incentive to effort was urged in connection with the Victory Loan, Patriotic Fund, Red Cross, and other drives. It found general expression in work, service, sacrifice. Everybody was living at high tension.

It is inevitable and only human nature that such a strain, for which many were ill-prepared, should be followed by a reaction, and that with the relaxed tension there should come a period of slackness, lessened production and lack of interest in work. It is the same feeling which forces a man after a period of tense application to take a holiday. The war saw an extreme of work and sacrifice; now we are having an extreme of slackness and selfishness, wherein everybody wants as much as possible by giving or paying as little as possible.

But along this path lies individual and national loss and, if persisted in, ultimate disaster. If we all look upon the world as our orange to be squeezed dry, at a time when a desperate struggle is in progress to rehabilitate it, then we are but hastening our own disappointment and increasing our loss. On the other hand, the man or woman who refuses to let themselves down, and who sticks to their job now will find in a comparatively short time that they have not only rendered real service to their country and the world, but that they have enormously advanced their own interests and placed themselves in a strong position to meet and overcome any of the adversities which may yet have to be faced before this old world is again established on a normal foundation.

A new broom sweeps almost as clean as a straight flush.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair; glorious fluffy, bright and so easy to manage. Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy golden gleams and tender lights. The youthful glints, tints and color are again in your hair. "Danderine" is a tonic-beautifier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get delightful Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

Among many people sneezing is interpreted as a sign of evil fortune. By many it was once believed to be lucky from midnight to midnight and unlucky from midnight to noon.

Britain's Debt to Canada

\$214,684,439 Due to This Country By The British Government

The Ottawa correspondent of the Toronto Globes says that, "Recently the Imperial government and Dominion government struck a balance of their indebtedness to each other, apart from certain accounts still under consideration. The federal government's indebtedness to Great Britain, with the exceptions noted, was therefore wiped clean off the slate, leaving an amount of \$214,684,439 due to this country by the British government."

"During the war Great Britain paid the expenses of feeding and providing munitions to Canadian troops, while in Canada the Dominion government looked after paying for all munitions and a large part of the foodstuffs obtained on British account in this country. There have been previous adjustments. The last adjustment concerned an amount of \$251,976,738 owing by Canada to the British government, and a total amount of \$466,661,177 owing by the British government to the Dominion government."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N. S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every mother to keep a box of the Tablets in the house. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teaching easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont."

Transaction of National Importance

Sun Life Assurance Co. Purchase Block of United Grain Growers Twenty Year Bonds

A financial transaction of national importance, but of especial interest to the farmers and grain growers of the West, has just been completed between the United Grain Growers and the Sun Life Assurance Company of Canada, according to an announcement obtained by this newspaper from Mr. E. A. Macnutt, treasurer of the Sun Life.

The remarkable growth and the vast amount of good accomplished by the United Grain Growers in their measures of co-operation in the marketing of grain, etc., for the farming community of Western Canada are well known. The board of directors of the United Grain Growers intend to branch out on a still larger scale, and has just authorized an issue of two million dollars of six per cent. first mortgage twenty year gold bonds.

Three quarters of a million of this issue has just been purchased by the Sun Life of Canada, and the remainder of the issue when needed by the Grain Growers will be offered to the Sun Life.

This is an instance of a Canadian life company which draws its resources in the way of premiums from the public, directly assisting a co-operative enterprise of a very important section of the people.

The bonds are secured on the elevators and real estate of the Grain Growers spread over the provinces of Alberta, Saskatchewan and Manitoba, and the Company is composed of more than 30,000 shareholders who reside in these western provinces and are farmers and grain growers.

The head office of the United Grain Growers is in Winnipeg and the offices are: president, Hon. T. A. Cregar; 1st vice-president, C. Price Jones; 2nd vice-president, J. Kennedy; secretary, J. A. Hand; treasurer, F. M. Black. The head office of the United Grain Growers is in Winnipeg, and the head office of the Sun Life is in Montreal.

Minard's Liniment Relieves Neuralgia

Food Shortage in Egypt
Food shortage in Egypt is being seriously felt in wheat provisions. Natives are unable to obtain wheat flour. Discontent is increasing in consequence.

In relation to all imports of food scarcity in Egypt, it is well to remember that for several years, owing to the fabulous value of cotton, Egyptian neglect the cultivation of foodstuffs.

It's easy to convince a woman that the photograph that flatters her is a better likeness than that which she sees reflected in the mirror.

W. N. U. 1311

Big Road Contracts to Be Let

Eight Hundred Miles of Road to be Built in Manitoba

Tenders for grading about 800 miles of roads will be called for in Manitoba within the next two months, according to information supplied by the province. This work will be let in contracts of from two to 75 miles. The work will be done under "The Good Roads Act," which has been a successful operation for the past six years. Up to the present, about 1,200 miles of work has been graded and about 400 miles travelled under the act.

In addition to the road work, it is expected that over 100 concrete bridges will be constructed. The bridge work will include a steel bridge 650 feet long over the Red River; a concrete arch 100 feet clear span over the La Salle River; several bridges of concrete over the Assiniboine River and a number of bridges from 30 to 50 feet clear span. Up to date, 384 bridges have been built under "The Good Roads Act," of which 271 were of concrete.

It is expected that over 4,000 miles of grading will be done in Manitoba within the next four years, and a large percentage of this mileage is to be gravelled.

Minard's Liniment Cures Burns, Etc.

Rapid Loading of Vessels

Docks at Duluth Speediest Ore-Loading Piers in the World

Figures of loading and unloading records made at the fastest and largest shipping docks in the world have just been announced. The steamship N. B. Ream passed through the Duluth ship canal at 11.30 p.m., May 29, and under the same canal 3 hours and 45 minutes later with a cargo of 11,880 gross tons of iron ore. She was at dock 55 minutes. Later in the season the H. D. Williams took on 12,765 gross tons in 45 minutes at the dock, and 3 hours and 50 minutes in the harbor. Still later the D. G. Kerr took on 12,689 gross tons in 35 minutes at the dock. This is the fastest time for loading ever made anywhere. The docks at Duluth, Missabe and Northern road, where these records were all made, are recognized as the speediest ore-loading piers in the world. It is not unusual to load a ship at the rate of 1,000 tons in 4 minutes. The ship W. A. McConaghe and L. C. Hanna unloaded coal at Duluth and Western and Berwind No. 2 docks at Duluth, during the past summer, at the rate of 1,150 and 1,272 tons an hour. These also are world's records.

"SYRUP OF FIGS"

CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. Mother! You must say "California."

The Candid Volunteer

An Australian who did clerical work for his government during the war tells how in going through a batch of enlistment forms one day and checking the usual questions as to name, age, address, occupation, and so on, he came upon one decidedly original reply. The question, "State in which enlisted," was answered by the assurance, "Strictly sober."

An Englishman and an Irishman met one day, and the former, wishing to have some fun with Pat, asked him if he was good at arithmetic. "I am that," said Pat.

"Then could you tell me how many shirts I could get out of a yard?" asked the Englishman.

"Well," said Pat, "that depends whose yard you get into."

No woman can reform a husband by continuous lecture process.

Will Locate in B.C.

Iron and Steel Industry On The Pacific Coast

A powerful British iron and steel company will locate in British Columbia and establish a complete plant for turning out all products of the industry, according to advice received at Vancouver, B. C., from England. Work on preliminaries connected with this firm's location for activity in western Canada has already been started. This company will be capitalized at five million pounds sterling, and will work in British Columbia with an established coal company having rail and water connections. Native ores of British Columbia are to be utilized.

Mill for Grinding Alfalfa

New Machine Will Turn Out The Actual Meal

One of the results of the huge alfalfa yield in the Lethbridge and Coaldale areas of Southern Alberta during the past season and an indication of the confidence of the farmers there that this is merely a beginning of the yields of this fodder crop that will be produced, is made evident by the purchase by a local company of an alfalfa mill costing \$15,000.

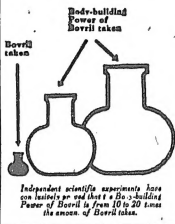

This mill grinds the whole alfalfa plant into a meal, which, it is declared, has proven the most economical way to feed alfalfa. Alfalfa chop has been used in the past, but the new machine will turn out the actual meal. Its installation will mark the advent of a new important industry in the development of the district.

The bigger the smoke the smaller the fire.

Trotsky Would Put Labor Under Military Discipline

Moscow.—Militarization is the only means to fully utilize Russia's man power, said Leon Trotsky, Bolshevik minister of war, addressing the ninth convention of the Communist party here. His address was directed to defining the relation between the mobilization of industry and the industrial rehabilitation of Russia.

"Mobilization is more necessary now than it was formerly," he declared. "We have to deal with the present population and masses of unskilled labor which cannot be utilized to the fullest extent by any other means than military discipline. Trades unions are capable of organizing great masses of qualified workers, but 30 per cent. of the people cannot be reached by this means."

Trotsky declared the working army which is built on the principle of compulsory work, is no less productive than was the old system of competition, and came out in favor of personal, rather than collective administration. He asserted political administration of railroads, was unsatisfactory and temporary, adding, however, it was necessary because railroad workers are more conservative in tendency than men engaged in other branches of labor.

Appeal for Funds To Help League

God Help Our Children If League Is Allowed to Withier and Die

London.—Earl Grey, Premier Lloyd George, Admiral Beatty, former premier Asquith, Lord Robert Cecil, and John R. Clynes published an appeal in the London Times for 1,000,000 pounds sterling, to keep fresh in the minds of the people of this country the spirit and ideals which underlie the covenant of the League of Nations.

The appeal points out what the League of Nations union has already done in its education campaign. It says that a million pounds sterling sounds like a large sum but that if the British people do not support the League of Nations with all their might and resources, "the league itself will assuredly wither and die and if the league should die, God help our children, for no human agency can save them from calamities to which those of our late war will appear as the merest trifle."

Australia Delays Action

London.—The Daily Mail's Sydney correspondent says that the Commonwealth government is not taking action regarding a larger navy until after the Imperial conference. It adds that Canada's decision to not enlarge her navy has caused local anxiety regarding the care of the Pacific.

Canadian Cars In U. S.

Ottawa.—In the house of commons the minister of railways informed Joseph Archambault that of \$9,716 Canadian cars in the United States, 10,840 belonged to the Canadian National Railway; 15,482 to the C.P.R.; 21,028 to the Grand Trunk Railway and 12,365 to other Canadian railways.

West Demands Control of Our Natural Resources

Ottawa.—Development of Canada's natural resources and establishment of a more uniform system of experimental farms came up for discussion in the house of commons. The first question, that of natural resources, was raised on a motion by Captain Manion, Fort William and Rainy River; the second by Donald Sutherland, of South Oxford. Western members seized the opportunity again to urge transfer of western resources to the provincial governments. Dr. Cowan, Regina, argued that had the western natural resources been in the hands of the provincial governments, action to develop them would have been taken long ago. The present situation was "impossible."

"I myself heard Sir Robert Borden declare in 1911 that he would do all in his power to see that the resources were turned over to the provinces," Dr. Cowan declared further. He spoke of millions of feet of lumber

All-Canadian Film Service

Legislation to Amend Moving Picture Act in British Columbia Planned

Victoria.—Legislation to amend the British Columbia Moving Picture Act, designed to authorize the creation of machinery for the taking of pictures in British Columbia of an educational nature and for their exhibition in the "Movies" and amusement houses of Canada, was introduced here by Hon. J. W. Deb Farris, attorney-general. The amendment is interpreted to contemplate the inauguration of an all-Canadian film service in the matter of purely educational and domestic subjects peculiar to the Dominion.

Says Sims Was Indiscreet

Rodman Criticizes Rear Admiral For Publishing Confidential Conversation

Washington.—Admiral Hugh Rodman, commander-in-chief of the Pacific Fleet, told the senate investigating committee today that Rear Admiral Sims' letter to Secretary Daniels criticizing the navy's part in the war, was "very indiscreet."

"Admiral Sims' indiscretions," he said, "lay very particularly in his breach of confidence in making public an intimate and confidential conversation, which should have been held secret."

The witness referred to Sims' testimony that Admiral Benson, former chief of naval operations, told him prior to his departure for London, "not to let the British pull the wool over your eyes; we would as soon fight them, as the Germans."

Admiral Rodman said the publication of that statement by Admiral Sims, "no doubt has had its effects upon the cordial relations which heretofore existed between us and one of our closest allies."

Irish Outrages Enumerated

London.—One thousand and eighty-nine outrages were committed in Ireland between January, 1919, and March 29, 1920, according to an official white paper, which attributes them to the Sinn Féin movement.

Thirty-one police, military and officials; and five civilians were killed; 81 were fired upon and 32 were assaulted. This total does not include the police barracks, to the number of more than 200, destroyed during Easter week.

France Consulted With Allies

Paris.—A note by Premier Millerand was read to the ambassadors today and then delivered to the German charge, Wilhelm von Mayer, in which the premier declared that France had taken great care to inform and consult with the allies before occupying the Rhine cities.

Farmers Want Toronto Port

Toronto, Ont.—Negotiations are under way for the United Farmers of Ontario to purchase the Toronto World, according to information in circles well informed of the farmers' plans.

And millions of tons of the best coal in Canada, lying within eight miles of the government-owned railway.

In his motion, Captain Manion urged that the government should, as soon as possible, "bring forward a policy having for its object the development of the natural resources of Canada."

He spoke on the need for developing Canada's resources. The government might take over development itself, or assist private enterprise, Capt. Manion did not stipulate that the government should adopt any particular method, but he strongly advised immediate action.

Major Redman, Calgary, favored scientific research in every possible way and advocated establishment of a government bureau on natural resources similar to that of the United States. There was plenty of coal in Alberta if railway rates could be modified to compete for eastern trade.

Indians Will Appeal To High Court

To Decide the Matter of the Rights And Status of Indians In Canada

Ottawa.—That the matter of deciding the rights and status of Indians in Canada will likely be taken to the highest court in the British Empire, was the statement made, by A. C. Delisle, who described his standing as the mayor of Caughnawaga, and chief of the Caughnawaga Indians. Asked pointblank by the chairman of the commission deliberating on the proposed amendments to the Indian Act, Delisle said he did not know whether he was a subject of the present King of England, but he did know that he was entitled to protection from the British Crown by reason of treaties entered into between the British Crown and his forefathers as far back as 1744.

The sitting of the committee was taken up almost entirely with the hearing of chiefs from the various tribes. Mr. Delisle, who represents about 2,400 members of the Caughnawaga band, said they wanted to give any Indian the right to be a white man, but they did not want to make it in any way compulsory.

"This Indian act has made Indians of more white men than it has made white men of Indians," he declared with vehemence. He also strongly objected to a man who changed his race being allowed to stay on the reserve. The man should be compelled to sell his land to the remaining members of the band.

"It simply means expropriation and the disintegration of the band, and as such is entirely unconstitutional. My opinion is that it should go to England to be decided by the highest courts there."

Andrew Paul, a young Indian representing the Squamish Indians of British Columbia, corroborated the claim of Delisle. His people, he said, had no copies of the proposed bill and did not want any.

"They do not want to understand it, they do not want it anyway, whatever it is," he said, and then left the room.

Other delegates urged that they should not be enfranchised because they did not pay any taxes.

Abandon Control of Newspaper

Announcement Follows Decision Of Supreme Court In Price Bros. Case

Ottawa.—The board of commerce announces that it will not henceforth claim to exercise any control whatever over newspaper paper in Canada. The announcement follows the decision of the supreme court in the Price Brothers case that newspaper paper was not a necessity of life within the meaning of that expression in the Combines and Fair Prices act and that the powers exercised by the board of commerce as newspaper controller were without jurisdiction.

The board points out that the effect of the supreme court's decision is to render inoperative the orders-in-council constituting the board of commerce as controller of newspaper paper in Canada, and for this reason the board announces its intention of abandoning the control of newspaper, unless the board is subsequently invested, if that be legally possible, with competently granted power.

The board's announcement adds that the supreme court's decision does not involve the general powers of the board of commerce, except in so far as it, to some extent, limits the interpretation which the board might place on the expression, "necessity of life." The general powers, it is added, will be pronounced upon by a subsequent decision of the court.

This decision will follow a rehearing in the supreme court on May 4 next, of certain points in the recent argument heard in the court to test the powers of the board of commerce as a price-fixing tribunal.

Bolsheviks on Polish Front

Washington.—Bolshevik Forces on the Polish front are being regrouped and fresh forces brought up, the Polish war office today advised Major-General Hoffman, military attaché of the Polish legation here.

"In the sector of Polesia, the Bolsheviks are on the defensive," the despatch said. "On the Vollynian front they continued to attack us near Slawetschno."

Buried Shells Kill French Farmers

Cambray.—Two explosions in which 12 persons were killed and two injured have occurred in the district of Villers Guislain, 18 kilometres from Cambray. The explosions were caused by agricultural tractors coming in contact with unexploded shells in fields which were being plowed.

W. N. U. 1311

Germany Would Send Arms to Irish

Report of Uprising on Easter Is Said To Have Been Confirmed

London.—Recent unconfirmed reports of a Sinn Féin plot for an armed uprising in Ireland were based on fact, according to the Irish police. They state that they are in possession of information not only indicating that the Sinn Féin were planning such a rising, but that certain Germans in Berlin had engaged to furnish war material.

In this connection Thomas J. Loughlin, a Dublin business man and a member of the Sinn Féin, has been arrested under the Defence of the Realm act. No definite charge has as yet been deferred against him, but the Irish police state that his arrest was effected after they had learned that he was a party to a treaty with the Germans for arms and ammunition.

With Loughlin's name, the police link that of Baron Lewis Von Horst, a former resident of the United States, who is now in Berlin, with whom it is alleged Loughlin was negotiating.

For Wheat Deliveries

New Regulations On Deliveries Of Wheat Promulgated By Board

Winnipeg.—The Canadian wheat board has issued a regulation (95) for the delivery of wheat by milling licenses, effective from this date inclusive, which reads:

1.—All wheat purchased by the milling licensee of the board shall, on demand, be delivered to the board.

2.—Until July 31, 1920, the board will purchase, or provide a purchaser for all wheat grown in the provinces of Manitoba, Saskatchewan and Alberta, delivered by any milling licensee of the board in stores.

The Canadian government elevator at Calgary, Saskatoon or Moose Jaw. A public terminal elevator at Port Arthur or Port Arthur.

Other elevators in Ontario and Quebec as specified.

Providing such milling licensee desires to the board on or before July 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store, the elevators herein before designated and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board.

3.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

4.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

5.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

6.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

7.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

8.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

9.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

10.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

11.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

12.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

13.—On June 30, 1920, the board will purchase or provide a purchaser for all wheat grown in the province of British Columbia delivered by any milling licensee of the board in store the Canadian government elevator, Vancouver, provided such milling licensee declares to the board on or before June 15, 1920, the quantity and grade of wheat intended to be delivered to the board in store the said elevator and on production of the proper documents of title, will pay or cause to be paid to the holder of such documents of title, the cash payment fixed by other regulations of the board, basis in store the Canadian government elevator, Vancouver, for the quantity and grade of wheat represented by such documents of title, together with any assessments paid to the board thereon in accordance with the regulations of the board.

Action of France Taken Without Consent of Allies

Divorce Court for Ontario

Bill Introduced in Senate Confers Jurisdiction to Province

Quebec.—The bill introduced in the senate by Senator Ross, and given the blessing of the government, confers on the supreme court of Ontario, jurisdiction in regard to divorce. There is a similar bill in relation to Prince Edward Island. In consequence every province will now have divorce laws.

The reform has been long talked of and is brought about by the appalling number who seek divorce by the parliamentary method. There are 128 applications this session. Of this number, 75 are from Toronto alone. The senate is not divesting itself of the right it possesses, but when the enactment becomes law, its divorce activities will become very much reduced. As the main opposition to the reform has come from Quebec, and as that province is left alone, the presumption is that the measure will pass with little difficulty.

Tried to Destroy Mines

Bolshevik Troops Plundered Stores And Fired At Inhabitants

The Hague.—The Nieuwe Courant, describing the plundering of Essen by the Reds before the occupation of the city by government troops, says: "Part of the retreating Red troops gathered during the morning in Essen, captured all the arms which they had delivered, plundered the shops and finally left the town in automobiles, firing at the inhabitants. The Red army commander ordered that the mines be blown up, but the mine guards succeeding in repulsing the Reds, although great damage was done to the mines."

Bottom, in the Recklinghausen region, is also in the hands of the government troops. The occupation of the Mayence district also was a violation of the peace treaty, says The Hague Vademecum, in an article declaring that the German action in the Ruhr district likewise was contrary to the treaty of Versailles.

Newspaper Will Be Exhausted in 10 Years

Cleveland.—Newspapers on this continent will be without paper at the end of ten years unless there is conservation of pulp, declared Jason Rogers, publisher of the New York Globe, at a meeting of the Cleveland Advertising Club today.

"The output of print paper is now dwindling rapidly," he said, "and the outlook at the pulp mills of Canada and United States will not be adequate to meet the demand, even if the supply of spruce timber holds out."

Earl of Minto Taking Ranch

Montreal.—The Earl of Minto has announced his intention of taking an active interest in his ranch in Alberta, which borders upon that recently purchased by His Royal Highness, the Prince of Wales.

Rhine Republic Is Likely

Paris.—The newspapers of Berlin say today that news received from all parts of the Rhine provinces imparts the proclamation of a Rhine republic is imminent, according to despatches from the German capital.

Paris.—The newspapers of Berlin say today that news received from all parts of the Rhine provinces imparts the proclamation of a Rhine republic is imminent, according to despatches from the German capital.

French Troops Clash With Mob At Frankfurt

Mayence.—Disturbances broke out in Frankfurt today, but energetic intervention by the French troops restored order. From German sources it is learned that six Germans were killed and 35 wounded.

It is reported that the manifestations which gave rise to these incidents were due to an order originating in Berlin.

The first day of the occupation of Frankfurt passed without incident; the reception was by the populace was most cordial," said General Degoutte, the French commander, on his return from a tour of inspection.

"Then suddenly, on orders from

London.—It is stated that the British government has sent a protest to the French government with regard to the occupation of the Ruhr region.

After a long conference the French ambassador, Paul Cambon, had with Premier Lloyd George to day and a full discussion of the Franco-German incident by the cabinet council, at which the French view was fully explained to the British ministers, an authoritative statement was issued to the effect that France acted entirely on her own initiative in deciding to occupy German towns; that Great Britain, the United States, Italy and Belgium were all opposed to the plans and that France's action has caused a delicate situation. The matter is under discussion by the British and French governments and the hope is expressed that the situation may be stated.

The statement recites various expedients for dealing with the Ruhr situation, among others, the sending of allied officers with the German troops to supervise the German withdrawal. Another alternative was that the decision should be left with the German government, with the stipulation that "unless the status quo was sufficiently restored the allies themselves would occupy German points to enforce their demands."

The statement proceeds: "The German government appears to have acted precipitately and France to have responded by adopting a plan which was only intended as a last resort, and even then to have been the affair of the allies and not of any one of them singly."

Great Britain, Italy, Belgium and the United States, it is declared, all felt that the task of restoring order should lie with Germany and all were opposed to their regular forces being called upon except as a last resort, to undertake what are virtually police duties. It is pointed out that France feared some ulterior motive on the part of Germany and doubtless acted in good faith, but, adds the statement, the immediate result is that the responsibility for her action cannot be shared by the allies as a whole and certainly there is no intention on the part of the British government to allow British soldiers to act as police between hostile German factions and incur all the odium of such a position, to say nothing of its risks."

The statement concludes: "If and when France's suspicions of Germany's ulterior motives and deliberate flouting of the terms of the peace treaty become accomplished facts, the allies would doubtless be prepared to act instantly and vigorously in concert to vindicate the position and respect for the provisions of the treaty. But for the time being, it may be taken that no British soldier will participate in the occupation of German cities in the neutral zone."

Railroad Strike Spreading

Chicago.—An unauthorized strike of railroad employees, which started a week ago in the Chicago switching district, by the discharge of a yard conductor, tonight had spread until it had effected 25 railroads and in Chicago had thrown more than 50,000 out of work, directly and indirectly. More than 10,000 union railroad men in Chicago and several hundred at Buffalo and Champagne, Illinois, were on strike. Many hundreds of men in Chicago packing houses were thrown out of work by lack of livestock.

Make a real job of it.

PAINTING becomes necessary as your property increases in value, and as property was never so valuable as today there is a greater need than ever for that kind of paint which actually preserves the surface and thus saves the entire house.

This spring, to make a real job of it, use

B-H PAINT "ENGLISH" 70% Pure White Lead (Equivalent to Genuine B.B.) 30% Pure White Zinc 100% Pure Paint

because it combines permanence, covering capacity and economy.

If B-H "English Paint" was dearer than it is, it would still be the most economical—the shorter life of other cheaper brands makes them more expensive in the end.

It contains the famous Brandram's Genuine B.B. finely-ground white lead—70%—to which is put 30% of pure zinc—a guaranteed formula that no other paint can boast. To this mixture is added fine turpentine and linseed oil from the B-H mills, which is of a quality in keeping with the other ingredients.

When you use B-H Paint you will notice its "body" and brilliance—you will compare the extreme covering capacity with other brands—the permanence you will be able to prove by other exteriors painted with B-H paint years ago.

This Store sells B-H Products—

Color cards free on request.

West Is Demanding Completion of the Hudson Bay Road

Resume of address of J. A. Campbell, M.P., at the Forum, Ottawa, on Sunday evening, March 21.

For practically half a century there has been an insistent demand on the part of the west for a railway to Hudson Bay as part of an overseas route. This was subsequently recognized as a national project, was advocated and construction promised by leaders of all political parties from Sir Charles Tupper to the present.

The country generally recognized the strategic importance of the Hudson Bay and its commercial value as a water route to the east, and it was estimated that 10 per cent. to 15 per cent. of the value of wheat and other products from the prairies might be secured by this means of transportation, the railway being looked upon as a bridge from the fertile plains of the west to the seaboard at one of the ports on the bay. Varied expeditions were sent out to examine the feasibility of the route, particularly those under Gordon, Wakeham and Bell. As the result of reports sent in and other evidence obtained, construction of the railway was decided on and work commenced in 1910. The progress was somewhat slow, but continued to the end of 1917 at which time the grade had been completed to the Bay at Port Nelson, a distance of 424 miles from The Pas, and rails laid as far as Kettle Rapids, mile 332, the work done including the erection of two large steel bridges over the Nelson.

An item of \$1,000,000 was placed in the estimates for 1918 for the purpose of completing the railway by laying the steel for the remaining 92 miles. No work, however, was done during that year, and in 1919 there was nothing in the main estimates for this project, the government evidently having turned its attention to more eastern enterprises such as the Trent and Welland canals, which were liberally provided for, and the attitude of the government indicates an intention to abandon the project for the time being at any rate. Over \$200,000,000 have been spent on the railway, and terminal works at the bay.

An engineer on the Hudson Bay Railway decided to take a short trip inland during the fall of 1915 for the purpose of seeing the country and doing a little prospecting. The trip resulted in the discovery of one of the richest copper deposits in the world, and from the Mandy mine there has already been taken out 26,000 tons of sulphide ore averaging 20 per cent. of copper. Within five miles of this, and at about the same time, another discovery was made, which after two years of diamond drilling has been shown to contain almost 20,000,000 tons of sulphide at a normal value of from \$8 to \$10 a ton. This property is now widely known as the Pine Flon deposit, and has been optioned to a New York syndicate who have undertaken to spend at least \$200,000 during the next six months in underground workings. Reports all go to show that this is one of the largest deposits on the continent, and no doubt its development will mean the construction of a branch line from the Hudson Bay Railway, the erection of a smelter and the establishment of a large mining camp. These properties are at the western end of a mineral belt stretching for a distance of one hundred and twenty-five miles to the railway. At the eastern end several gold discoveries have been made, and one of them has already become a shipping mine.

Along the line are vast areas of land capable of cultivation. In a 100 mile stretch it is estimated there are 10,000 sq. miles of good arable land, tributary to the railway and in due course this land will be occupied and be productive of bountiful crops.

The present demand for paper is directing attention to the extensive and valuable pulp areas of the north, and particularly to the fact that there are available excellent water power facilities, the Nelson alone being capable of developing three and a half million horse power, and the railway practically parallels this river for the greater part of its length. Then there is always the fur trade which becomes increasingly important as the railway is extended, thus giving greater facilities for bringing out the season's catch. It is estimated that The Pas will be a market this year for \$2,000,000 worth of furs.

Outside of the opening up of the intervening territory, the line may be fully justified if only for the purpose of connecting the Hudson Bay with the prairies. The products of this great inland sea and the territory adjacent thereto promise in the future to be placed in the first rank among our natural resources.

Intervening years have increased the west's confidence in the feasibility and importance of the project. The chief centres of population throughout the prairie provinces are pressing for a direct connection with The Pas, the southern terminus of the road. The C.N.R. is now building northwesterly from Melton through the Carrot River Valley, the ultimate object being a short through line from The Pas to Saskatchewan and Calgary. The construction of only sixty mile road will make a direct connection with Regina. The people from across Saskatchewan are urging a line to connect the coal fields of Estevan with the northern route, probably taking in Mooseomin on the way, and there is now a reasonably direct route via Prince Albert to Edmonton.

Besides, the west is paying for the road, certain lands having been set aside years ago to provide by this sale a fund for the purpose. An official statement issued about a year ago set out that \$28,000,000 of these lands have been sold, and almost \$13,000,000 already collected. The discontinuance of this national enterprise would mean a serious financial loss by deterioration of the partially constructed line. It would mean the stoppage of important developments now in their initial stages. It would also mean a breach of faith with the western provinces.

An official statement issued about a year ago set out that \$28,000,000 of these lands have been sold, and almost \$13,000,000 already collected. The discontinuance of this national enterprise would mean a serious financial loss by deterioration of the partially constructed line. It would mean the stoppage of important developments now in their initial stages. It would also mean a breach of faith with the western provinces.

Alberta-Made Tractors

First Tractor Made in Western Canada Produced by Medicine Hat Plant

What is claimed to be the first tractor made in a Western Canadian plant was completed by the Alberta Foundry and Machine Company at Medicine Hat, a few days ago, and sent to Regina, Saskatchewan for demonstration purposes. Several more will be completed this week, and forwarded to Saskatchewan, where the demand for them exceeds the supply. Except for the mechanical oiler, magnet, carburetor and radiator, all of which are patented, the Canadian tractor is manufactured entirely by the Alberta Foundry and Machine Co. It has been tested out thoroughly and found satisfactory. This tractor will have three plows in breaking and will sell at a price which makes it one of the cheapest tractors for its power in Canada.

The company has spent \$150,000 on extra tools and equipment for making these tractors, and the floor space devoted to them totals 30,000 square feet. The complete plant of the company now represents an investment of a quarter of a million dollars.

Canada's Pulp Industry

About 90 per cent. of the News Print Manufactured in Canada Is Exported

"Ten years ago the number of employees in the pulp and paper industry of Canada was about 9,000," says Mr. Clyde Leavitt in a recent article. "The number of employees at the present time is estimated at 25,000, and the annual wage bill at \$20,500,000. About 90 per cent. of the newsprint manufactured in Canada is exported. The exports alone from the past fiscal year for the pulp industry is about \$100,000,000. More than one third of the newspaper used in the United States is of Canadian manufacture."

"Prospective increases in the capacity of Canadian plants will bring the production of newsprint during the coming year, on a conservative estimate, to a total of 850,000 tons. "The importance of all this in the maintenance and development of the economic structure of Canada, can scarcely be overestimated. Obviously it would be the poorest kind of public policy for the respective provincial governments to relax the existing embargoes upon the export of raw pulpwood cut from Crown lands. Such a course would inevitably mean reducing the supplies of raw materials available for Canadian mills, as well as the more rapid depletion of our pulpwood forests, resulting in their comparative exhaustion within a measurable period of time. About 1,000,000 cords of pulpwood is now seen in a raw state all cut from lands in private ownership. Practically all of this goes to the United States."

Mr. Leavitt is a noted Canadian forestry expert.

Adam must have been swift footed, inasmuch as he was first in the human race.

After someone get a start in life they don't know when to stop.

The Story Of Battleford

A Landmark in the Story of Western Development

It is only of recent years, since the opening of the country by the railroads and the discovery of its wonderful possibilities, that Western Canada has found its way into the histories of the world. The stories of the early settlers who penetrated an almost unknown land full of hope but of uncertainty of the future, the Indian troubles, the proving of the fertility and productivity of Western soil, the transition of the prairie from its primitive wildness to the huge and productive grain areas supplying the granaries of the world—all these are almost too near to our own epoch to yet be history. Yet there are certain localities which constitute landmarks in the glowing story of Western progress, names already fragrant with historical aroma, blending the romance of early settlement with the bustle of modern industry and agricultural progress. The Battleford district is one of these.

The city of Battleford, beautifully situated where the Battle River and mighty Saskatchewan converge, was one of the earliest of Western settlements—a thriving little community in the era before railroads. It linked up Winnipeg with Calgary and Macleod on the main trail which led through what are now the prairie provinces. In 1878 it was made the seat of the North West Territories' Government and parliament continued to meet there until the penetration of the Canadian Pacific Railway further south and the consequent attraction of settlers along its tracks caused it to relinquish this honor in favor of the more conveniently situated town of Regina. Its name occurs frequently in the tales of early western settlement and the Battleford district was the scene of many bloody encounters between pioneers and Indians. At the barricade of the town the Indian chief, Poundmaker, surrendered to General Middleton on May 26th, 1885, virtually closing the chapter of Canada's Indian wars.

It is in this historic district, that one of the last blocks of land owned by the C.P.R. is just becoming available for settlement. It is a beautiful park area of picturesque shaded groves, rolling upland and luxuriant meadows. The country is admirably suited to mixed farming and the live stock industry, or its rolling slopes produce fine hay, and its clumps of trees, while offering no serious obstacles to grain growing, afford shade in the summer and shelter in the winter. The soil is a rich chocolate loam with a clay subsoil ensuring a conservation of these ingredients which make for rapid and hardy growth. Wheat is grown extensively and successfully as well as other cereal crops. Every phase of agriculture, in fact, has been successfully carried on. Poultry raising, market gardening and vegetable growing flourish, whilst there is no better dairying locality in the Western provinces.

Accommodation for Flyers at Calgary

The city of Calgary may erect an aerodrome to accommodate local and long distance flyers this year, the city commissioner having looked favorably upon a request of Capt. Betts, who represented the Aero Club of Canada and the McCall Aero Corporation at a meeting with the city commissioners recently. If arrangements can be made, suitable flying grounds will be leased and a hangar to accommodate at least three airplanes will be erected.

Glad of the French Army

Theory That Way to Insure Peace by Disarmament Shattered by Events at Berlin

The Paris Temps mentions no names, but it evidently was looking toward the United States when it made the following comment: "If ever the counter-revolution relights the war and costs the lives of French soldiers, we hope that an accounting will be demanded by those people who at the moment when a military dictatorship has established itself in Berlin have nothing better to do than to protest against the allied precautions as militaristic."

If German developments should force a renewal of the war, the civilized world will have good reason to rejoice that France, at least, has kept up her army, and it may equally be glad that Italy has kept up her army also. It may also be at matter for general congratulation that the United States Senate never has ratified the peace treaty. This country, therefore, is still in an official state of war with Germany and in position to give immediate support to the French, Italians and British in case of need. The two Latin nations would have to rely on us mainly for financial backing, but, if that were promptly granted, with the moral support which such a grant would imply, they probably would be able to handle the military work.

The theory that the way to insure future peace was to begin by renunciations, disarmament and discord among the nations which won the war must have been effectually shattered in most minds by the events at Berlin.

More Consolidated School Districts

Three New Districts Have Been Elected in Saskatchewan

Since the beginning of the year, three consolidated school districts have been elected in Saskatchewan. This makes a total of 31 consolidations in the province to date.

The last two districts to have their applications for consolidation approved by the minister of education are Neherhill and Khedive, each of which will take in two old districts and parts of others. Tribune held a meeting recently and voted by a large majority for consolidation. It is planned at Tribune to take in three existing districts and the old portions of several others.

Admiralty Against Use of Submarine

Admiralty Thinks the Submarine Is A Horrible Form of Warfare

The British Admiralty has never concealed its view that the work of the submarine was a horrible form of warfare, and nothing would give it greater pleasure than if the submarine could be "turned down," it was declared by Walter Long, first lord of the admiralty, in a recent discussion of naval matters in the house of commons. Mr. Long added, however, that he doubted whether this was at all practicable politics as the method of defence by the submarines was very attractive to small and poor countries which could not keep up the costly fleets of battleships or cruisers.

Some people are always looking for a new kind of mistake to make.

Sir Arthur Currie Tells of Great Work Of Canadian Troops

Canada entered the post war period with the same degree of courage and high sense of honor as she entered the war; and, as in the war she proved herself second to none in war activities, either in the field or at home, earning a proud place beside Great Britain among the civilized nations of the world, so she accepts this place with humility and a deep sense of her duties towards other nations of the world and towards civilization, according to Gen. Sir Arthur Currie, K.C.M.G., K.C.B., Inspector-General and military counselor of the Dominion of Canada, speaking at the annual meeting of the Canadian Club in New York.

At this time and in this place it is not befitting to brood over the troubled conditions prevailing throughout the world—what is in store for tomorrow is not known—to use the powerful evocation of General Smuts, "the tents are struck, the camels are loaded, once again the caravan of humanity is on the move," said General Currie.

"Trials and tribulations may be coming, the present social and political status of civilization may be greatly altered before the caravan of humanity pitches its camp again; but, whatever comes, we may be confident that Canada will face the issue squarely, with the resolute courage, foresight and unselfishness earnestness it has shown in the crisis just passed."

General Currie told in detail of the record of the Canadian corps in the world war; of its continuous and successful fighting during more than 100 days, including the battle of Amiens, Arras and Cambrai, in which period it delivered more than 300 square miles of territory, liberating 228 cities, towns and villages, taking 32,000 prisoners and capturing large numbers

of machine guns, field guns, trench mortars.

During that time, he said, the Canadian corps decisively defeated more than 50 German divisions, approximately one-quarter of the total German forces on the western front; encountered and crushed elements of 17 additional divisions, then marched across Belgium and contributed two of the four British divisions which held a bridgehead in the Rhine area.

Throughout the four years of the war the Canadian corps never permanently lost a gun and in the last two years never failed to capture an objective or to retain those objectives, once consolidated, he reported, adding:

"The extraordinary successes won by the Canadian corps can only be explained by its superior organization and the esprit de corps which united all the component parts of the Canadian forces and made them work all for one, and one for all, with victory only as the ultimate goal.

"By their services and their sacrifice they have created a national tradition which shall forever inspire our people and lift our souls to higher spheres than of material profit and industrial achievement. By their efforts peace has come; by their sacrifice Christianity has endured; by their patriotism and love of country the empire remains inviolate; by their devotion to duty, honor has been preserved. Would that one could say that by their willingness to die, selfishness had disappeared from the world."

"May the peace which has come be a lasting peace, not only a peace between nations, but a peace between families, between communities, between classes, between warring factions in the industrial world and in the political world."

Wireless Telephony In British Columbia

First Message Despatched Through The Air Between Vancouver And Victoria

Vancouver and Victoria have been in communication by wireless telephone. The first message ever despatched through the air between the two cities was distinctly heard through a receiving instrument at the court house at Vancouver by a local newspaper man and the wireless operator. "The message was spoken into the air from the Parliament buildings in Victoria, where a transmitting apparatus has been installed. By agreement it had been arranged that the establishment of communication was to be tested by repetition of the first ten numerals. The operator heard the first six, then the receiver was transferred to the journalist, who heard the last four.

British Officers to Settle in B.C.

Thirty-five hundred ex-British army officers and their wives are expected to locate on the land in the Columbia River Valley, British Columbia, this year, according to Canadian Pacific Railway officials. Arrangements to transport the prospective settlers to Canada have been completed and the contingent will leave the old country within a few weeks, it is said.

Distribution of Gopher Poison for Farmers

Offer of Government Applies to Settlers in Local Improvement Districts

Arrangements are now completed by the Saskatchewan department of agriculture for the free distribution of a limited amount of gopher poison to resident settlers in local improvement districts in southwestern Saskatchewan where the gophers have become so numerous as to be a serious menace to the crops. A quantity of poison has been purchased and some 500 farmers should make application to the department at once as it is unlikely that any application will be accepted after May 1. One of the conditions made is that poison supplied free will be prepared and put out before May 15. Early poisoning is recognized to be by far the most effective means of materially reducing the numbers of the pest before the young appear and the bait is more attractive before the crop shows up much.

Where there is a local Grain Growers' Association application should be made through the secretary. Forms are now being sent out to all settlers in the unorganized units. One ounce of strychnine will be allowed each quarter section cultivated by the applicant.

Forms may be secured on application to the weeds and seeds branch of the provincial department of agriculture.

Wire Rope Plant for B.C.

Will Cover Four Acres and Is Expected Will Cost \$250,000

The George Cradock Company, wire and cable manufacturers of Wakefield, England, has completed plans for the erection of a large wire-rope factory in Victoria, British Columbia. The property chosen for the site consists of four acres of land. It is owned by the Canadian Pacific Railway, which is offering it at a price approximating \$200,000.

The erection of this factory will probably prove to be the starting of a large industrial centre on this tract of land.

An engineer of the Cradock Company is now said to be on his way to British Columbia to superintend the construction of the factory, which will manufacture wire rope and cables for the Pacific Coast and Oriental trade. The plant will cover four acres and is expected will cost \$250,000.

BAR U AND NAMAKA FARM, PERCHERONS

The largest stud of the Purchered Percherons in the World. The Bar U and Namaka Farm Established in Canada. The only firm on the American continent from which British horsemen have selected Percheron breeding stock to establish studs in Britain.

Do not let the British breeders come to Canada and carry off all our best four-year-olds. Do not be satisfied with the cheap quality of those brought in from the United States and stallion peddlers from the United States, when you can buy the best individuals of the best breeding raised right here in Alberta by men that have been in the breeding business for 25 years. We expect to remain in the business. We have twenty-four head of Purebred Percheron Stallions of our own breeding now on hand to select from. You can see their sizes and data and the pure cannot choose one from the lot to suit you will give you every assistance in our power. Write for prices or come to Calgary, Alberta, and we will meet you and show you the stock at any time.—Address—

GEORGE LANE (Desk B), CALGARY, ALBERTA

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—A pleasure to handle. You will make no mistake in your horse breeding this year if you use a Percheron sire.

Demand for Good Horses

Sires At This Season Are A Community

You should co-operate with your neighbors in order that some good sires may be brought in by private parties, or leased before the breeding season opens. Because:

1. The demand and price for good horses and mules is increasing in cities.

2. Farm demand is improving.

3. There is a shortage of good horses and mules of all kinds.

City trade is improving, because transportation users of all kinds have discovered after years of experience that horses furnish the cheapest of all sources of power on short hauls.

On this Harry Vickers, president of the Fuel Cartage Company of Chicago, says:

"There is work today that the horse cannot do—long distance hauling with rapid transportation—but the motor can never take the place of the horse, because the horse can do the work on short hauls just as rapidly and at a lessened cost of 25 to 40 cents on the dollar, consequently we never allow a truck to displace a team. We will buy a truck to do the work that a horse cannot do, but we don't send a truck to do the work that a horse can do. It would be like having a dollar and throwing away 40 cents."

Of the farm demand, W. S. Cora says: "Farmers are determined buyers in country sales and prices for good horses have gone \$35 a head in the last thirty days, while mules are bringing from \$800 to \$1,000 a pair."

"Of the shortage, W. Y. McCreary, of the McCreary Transfer Company, Minneapolis, says: "What we teaming contractors want is good horses. We don't want scrub light of weight, incapable of hard work, and selling cheap. We want horses that will weigh 1,700 pounds or more and we are willing to pay for them. A teaming contractor in this city paid \$800 for a pair of five-year-olds yesterday that weighed 3,200 pounds. The big trouble is that the farmer expects us to pay high prices for a green horse, one that is liable to distemper and is not properly broke. The buyer of such a horse is taking a big chance that he'll die or be laid up and, consequently, won't pay as much for him. Give us good, sound, big horses with a little experience behind them. We can't get enough of them and the dealer will never run out."

Claims of truck and tractor manufacturers that horses and mules are destined soon to disappear are very properly met with the query: "Why should horses and mules, which, according to your views, are obsolete and destined to speedy disappearance, be in greater demand and at higher prices than ever?"

The best thing a farmer can do this spring is to breed his good mares to a first-class stallion.

Indians Seeking Rights

Indians of East and West Decide to Stand by One Another

An informal meeting was recently held in Ottawa of representatives of the various influential bodies of Indians in Canada. The delegates were representative of the Council of the Six Nations of Brantford and of the allied tribes of British Columbia. Whilst no resolutions were passed it was decided to stand by one another in the interests of their rights and privileges, whilst a proposal to establish a general Canadian Indian alliance was favorably received.

The principal subjects discussed were (1) the pending bill before parliament proposing compulsory enfranchisement of Indians; (2) The wrongs of the British Columbia Indians, arising from the complete denial of that province of any land rights or other tribal rights whatsoever to them. The bill is now before the House of Commons, by which it is proposed to carry into effect the agreement regarding reserves entered into between the two governments in the year 1912, which was based upon the assumption that the Indian tribes of British Columbia have no land rights; (3) The interesting historical claim of the Six Nations to the government of their own internal affairs. The conference is to be continued and is expected to be of benefit to all Indians in Canada.

For Decreasing Armaments

Benefit Relationship Between U. S. and Britain By Disarming

Discussing the American presidential situation and its possible effect on the relationship between Great Britain and the United States, the London Daily News, under the caption "America and Arms," refers to the reaction from war in the United States.

"Rightly or wrongly," the newspaper says, "America revolted against the treaty her representatives had helped to draft, and under the influence of that emotion resolved not to merely maintain her detachment from Europe, but to arm herself potentially against Europe."

"Nothing" will bring the two hemispheres together more rapidly than a demonstration from this side of the Atlantic of a sincere resolution to disarm. Nothing could be more beneficial to Anglo-American relations than an invitation, extended more than once, by Walter Hume Long, speaking officially as first lord of the admiralty, for completion with America, not to increase armaments, but to decrease them."

A GOOD MEDICINE FOR SPRING USE

Harsh Purgatives Should Be Avoided—A Tonic Will Restore Your Energy

Not exactly sick, but not feeling quite well. That is the way thousands of people feel in the spring. It is a sign that the trying indoor life of winter has left its mark upon you. Easily tired, appetite fickle, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neurgia. Any of these indicate that the blood is out of order, and these symptoms may easily develop into more serious trouble.

Do not dose yourself with purgatives as so many people do. In the hope that you can put your blood right. Purgatives gallop through the system and weaken the body and depress strength. Any doctor will tell you that this is true. What you need in the spring is a tonic that will build up the blood and nerves. Dr. Williams' Pink Pills can do this speedily and surely. This medicine enriches the blood, clears the skin, improves the appetite and makes depressed men, women and children bright, active and strong. As an example of the value of this medicine we give the statement of Mrs. S. McBurnie, Tatum, N.C., who says:—"I have good reason to speak in the highest terms of Dr. Williams' Pink Pills. I was badly run down, failing in weight and suffering from dizzy spells and nervous prostration. I was told that I was hardly able to do my housework. A friend advised me to try Dr. Williams' Pink Pills, and after using several boxes there was a noticeable improvement. I continued using the pills for some time longer and the result was a complete recovery of my old time health and strength and was able to do my housework without feeling weak and worn out as I did before I began using the pills."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or from the Dr. Williams' Pink Pills Co., Brockville, Ont.

Big Land Deal in Saskatchewan

A sale of farm land amounting to a quarter of a million dollars was effected by Charles A. Alexander, a real estate agent in Minneapolis, Minnesota, representing a number of Iowa men. The land is in Saskatchewan in the Humboldt district, one of the best mixed farming districts in Western Canada.

DARTING, PIERCING SCIATIC PAINS

Give way before the penetrating effects of Sloan's Liniment

So do those rheumatic twinges and the low-aches of lumbar, the nerve inflammation of neuritis, the wry neck, the joint wrench, the ligament sprain, the muscle strain, and the throbbing bruise.

The ease of applying, the quickness of relief, the positive results, the cleanliness, and the economy of Sloan's Liniment make it universally preferred. 35c, 70c, \$1.40.—Made in Canada.

Sloan's Liniment Keep it handy

Consolidated
She lay in his arms and snuggled her head against his neck . . . a rush of emotion surged through her . . . she closed her eyes in delight.

"Poor kitty. Did I step on your tail?"

Charming is Right
What sort of a woman is she?"

"Charming. I was with her for two hours the other day, and in all that time she never once mentioned the high cost of living or the flu."

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

CONGOLEUM RUGS

Have you ever seen or used a Congoleum Rug? This a kind of Linoleum with a fancy border, and comes in full pieces. Let us tell you a few points about them:

- 1 They are guaranteed to give satisfaction
- 2 They are sold at a remarkably low price
- 3 They are absolutely waterproof and have a felt base
- 4 They are durable and hold their rich colors longer than a printed linoleum.
- 5 They are positively sanitary and vermin proof
- 6 They lie flat, do not kick up or curl on the edges and will give no trouble with expansion

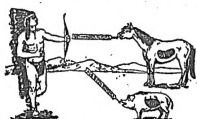

These are made in Winnipeg, and we can sell you a rug here in Chinook the same prices you pay for it f.o.b. at Winnipeg.

These sizes are in stock: 9x10½ ft, price \$22; 9x12 ft, \$25. Also just received more pieces of Linoleum. There are beautiful heavy pieces, very pretty designs, have a burlap base, 2 yards wide, \$3 running yd, a lighter grade, tar base \$2.50 running yard. Measure up your room and we will be glad to tell you what it will cost to make your home more beautiful, your house work lighter

Langford Happenings

Members of this Local U.F.A. are returning home in readiness for spring work, so we expect to increase our membership to more than double to what it is now. Some have been out to work to earn a grub stake, while others have been spending the winter with the old folks at home. Among these are E. P. Cooper, who has been back to England, evidently to make his trip both business and pleasure, as, we understand, he has been presented with a farm in his home locality. Lucky E. P. Also our preceding secretary, Mr. W. E. Chickering, has recently returned from his old home in Arkansas, bringing with him a bride. We all wish them many years of comfort and happiness in their matrimonial life.

Last Friday, the members and others planned a surprise, and a jolly good time was spent, upwards of 50 being present, Music and singing until 12 p.m., when supper was partaken of, everybody bringing a good supply. After supper, in behalf of the family, presented the bride and bridegroom a lovely bureau, from H. L. Anderson, by R. G. Hogg, at the same time making a short but suitable address, the bridegroom responding in the usual manner. A collection was taken up, amounting to \$19.50, a suitable present being decided upon which will be presented to the young couple at our U.F.A. meeting. After this the jazz band played to a good advantage and music and comic songs furnished the chief amusement until day-break.

J. Paden has just arrived home after about 18 months absence. Welcome home, John.

NOTICE

Citizens of Chinook

All licenses for dogs, auto-liveries, drays, laundries, livery-stables, and feed barns must be secured from the secretary-treas. by May 1st, 1920.

Note the following extracts from the by-laws governing the above:

1. The owner or harbinger of a dog or bitch shall take out a license for the same, the fee being \$1 and \$3, respectively.

Any person harboring a dog or bitch (whether owner or not) who neglects or refuses to take out a license shall be deemed guilty of an infraction of the by-law, and shall be liable to a penalty not exceeding \$100 and costs.

2. The owner or operator of an automobile who uses the same for hire, shall take out a license, the fee being \$15 for the first and \$10 for each additional auto.

3. That the operator of a dray or other vehicle used for draying, shall take out a license, the fee being \$25 for the first dray and \$10 for each additional dray.

4. The operator of a laundry shall take out a license, the fee being \$25.

5. The occupant of a feed or sales stable shall take out a license, the fee being \$20.

If a horse livery be operated in connection with it, an additional fee of \$15 shall be payable therefor, provided the operator has not already taken out an auto livery license.

6. The penalty for the breach of any by-law shall not exceed \$100 and costs.

Licenses may be procured from the Secretary any afternoon from the 20th to the 24th inst., from 5 to 6 p.m., at the town office.

Do not forget
to file your

Income Tax Return

on or before the 30th of April, 1920.

Dominion of Canada

Department of Finance

ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.

2. All other individuals who during the calendar year 1919 received or earned \$2,000 or more.

3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing returns on or before the 30th of April, 1920.

ALL INDIVIDUALS other than farmers and ranchers must use Form T 1.

FARMERS AND RANCHERS must use Form T 1A.

CORPORATIONS and joint stock companies must use Form T 2.

Penalty

Every person required to make a return, who fails to do so within the time limit, shall be subject to a penalty of Twenty-five per centum of the amount of the tax payable.

Any person, whether taxable, or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable, on summary conviction, to a penalty not exceeding \$10,000, or to six months' imprisonment or to both fine and imprisonment.

General Instructions.

Obtain Forms from the Inspectors or Assistant Inspectors of Taxation or from Postmasters.

Read carefully all instructions on Form before filling it in.

Prepay postage on letters and documents forwarded by mail to Inspectors of Taxation.

Make your returns promptly and avoid penalties.

Address INSPECTOR OF TAXATION,
CALGARY, ALTA.

R. W. BREADNER,
Commissioner of Taxation.
